

OVERVIEW

Telstra is a leading telecommunications and technology company with a proudly Australian heritage and a longstanding, growing international business. Today, we operate in over 20 countries outside of Australia, providing services to thousands of business, government, carrier and OTT customers. Telstra Enterprise is a division of Telstra that provides data and IP networks and network application services, such as managed networks, unified communications, cloud, industry solutions and integrated services. These services are underpinned by our submarine cable network, one of the largest in the Asia Pacific region, with licenses in Asia, Europe and the Americas, and access to more than 2,000 Points-of-Presence around the world. If your customers are doing business in Asia they should be doing business with Telstra. Think Asia, Think telstra
